1. Claims 17-21 are pending.

2. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 1-02-04 has been entered.

3. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

4. Claims 17-21 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter. Since the recited sperm protein is naturally occurring, and sperm is normally antigenic, antibodies to proteins exposed on the surface of sperm would be expected to be naturally occurring. Applicant can overcome this rejection with a recitation of an "isolated and purified" antibody.

5. The fax number for the organization where this application or proceeding is assigned is 703-872-9306.
